Joao De Campos Carvalho

647-971-6119 | johnny.carvalho@mail.utoronto.ca | linkedin.com/in/joao-de-campos-carvalho | Toronto, ON

SUMMARY OF SKILLS

Python, C++, PyTorch, TypeScript, MATLAB, Fusion 360, SolidWorks, Git, Linux, EasyEDA, Arduino, ESP32, Raspberry Pi

EDUCATION

University of Toronto, BASc, Mechanical Engineering + PEY Co-op **Sep 2024 - Apr 2029**

Minors: Robotics & Mechatronics, Engineering Business.

GPA: 3.25. CSWA-certified (Dec 2025).

RELEVANT PROFESSIONAL EXPERIENCE

Auditorium AI, Toronto, Canada **September 2026 - present**

Operations Lead

- Built the operating system: shared finance drive, per-event P&L; tracker, deals pipeline, gear inventory, weekly founder reports, giving the founders a weekly view of money, deals, and gear.
- Manage a content lead against an approved brief with weekly check-ins, shipping 8 pieces per month on a steady cadence.

Auditorium AI, Toronto, Canada **May - August 2026**

Lead Design Engineer

- Engineered a spatial-calibration feature mapping automated stage lighting to room geometry, uncovering two silent failure modes that every existing check had passed.
- Integrated hardware and software for a single-board-computer field device: field updates, device driver rules, and a Fusion 360 3D-printed enclosure, delivering a complete unit ready for event deployment.

UTESCA, Toronto, Canada **September 2025 - present**

VP of Outreach

- Built an automated outreach tracker in Google Sheets and used it to identify partners at consulting firms, converting 80% of prospects into partners.
- Run a weekly prospecting cadence for event partnerships, contacting one consulting firm per week and tracking each from first touch to booked meeting.

PROJECT EXPERIENCE

Robotics Project **September 2026 - present**

- Contributing ~3 hrs/week to the mechanical build of an SO-101-based robotic arm, covering CAD, assembly, and testing.
- Own funding/sponsorship outreach and team admin/GitHub for a 3-person build team, running the team's sponsorship pipeline and build coordination.

UHN Sleep Monitoring Device **January - April 2025**

Co-Manager

- Co-managed a 6-person team designing a low-cost sleep monitoring device with UHN, taking it from requirements to a working prototype.
- Originated 120+ design ideas and converged the team on a design 30% cheaper than industry competitors.

Eye-Tracker **2026 - present**

Personal Project

- Building a webcam-based gaze-tracking control layer that delivers full hands-free computer control with zero keyboard or mouse input.
- Designed the gaze-plus-voice interaction model: open-palm gesture as push-to-talk, voice-only destructive confirmations, and a gaze/voice guided first-run tutorial.

Awards: Bronze, Brazilian Mathematics Olympiad | Silver, Mathematique Sans Frontieres | People's Choice, UnERD 2026
